110 Volt Wiring. 110 volt power may be obtained from an outlet at a camp site or from a battery using an inverter. Inverters are available in different sizes from small models supplying 50 watts that plug into a cigarette lighter outlet to larger units hard wired into the system supplying 100's of watts.

Automotive fuses are a class of fuses used to protect the wiring and electrical equipment for vehicles. They are generally rated for circuits no higher than 32 volts direct current, but some types are rated for 42-volt electrical systems. They are occasionally used in non-automotive electrical products.
