A schematic, or schematic diagram, is a representation of the elements of a system using abstract, graphic symbols rather than realistic pictures. A schematic usually omits all details that are not relevant to the key information the schematic is intended to convey, and may include oversimplified elements in order to make this essential meaning easier to grasp.

## Schematic - Wikipedia

Electrical wiring is an electrical installation of cabling and associated devices such as switches, distribution boards, sockets and light fittings in a structure.. Wiring is subject to safety standards for design and installation. Allowable wire and cable types and sizes are specified according to the circuit operating voltage and electric current capability, with further restrictions on the ...

## Electrical wiring - Wikipedia

In Fig.19C, note that there are small numbers along the right hand side of the diagram as well.These numbers designate the line location of relay contacts. The small number 28 in the right-hand margin tells you the line location of the contacts associated with relay coil "IFR."
